

Omar Ashraf

Senior Full-Stack Software Engineer & Tech Solution Architect

omarasj445@gmail.com | Phone: +20 115 468 8628

Portfolio: omarashraf.online

Summary

Senior Full-Stack Engineer with a **B.Sc. in Computer Science & Artificial Intelligence** from Benha University and **5+ years** architecting and delivering scalable end-to-end web platforms. Currently engineering production-grade systems at **Navaia.sa** while serving as a Coding Instructor at **iSchool**. Deep technical proficiency across **React, Next.js, Node.js, and Python**, with extensive experience building **REST APIs**, integrating complex systems, and designing optimized database architectures on PostgreSQL and SQL Server. Skilled in developing executive dashboards and interactive reporting systems powered by Power BI and Tableau, with strong capabilities in data integration, processing, and transformation pipelines. Hands-on with **machine learning** concepts leveraging Pandas, NumPy, and Scikit-learn to build and integrate **ML models** into production applications via **APIs**. Well-versed in Git, Docker, CI/CD pipelines, and cloud environments, with a security-first approach encompassing **secure coding practices, authentication, RBAC**, and scalable software architecture. Domain experience spans **LMS, e-commerce, QA, analytics, and entertainment platforms**. Consistently driven by clean architecture, system reliability, and measurable business impact.

Core Technical Skills

Languages: TypeScript, JavaScript, Python (FastAPI, Flask), SQL

Frontend: Next.js, React, Redux, Tailwind CSS, HTML5, CSS3, Responsive UI/UX

Backend & APIs: Node.js, Express, Python backends, REST APIs, tRPC, ORPC, Query Optimization, Authentication & Authorization

Databases & ORMs: PostgreSQL (Neon, Supabase), MongoDB, Firebase, SQLite, Prisma ORM, Schema Normalization, Microservices Architecture

Testing & QA: Playwright (E2E), Jest, Unit Testing, Integration Testing, Test Automation, QA Pipeline Integration

Cloud & Deployment: AWS (EC2, S3, RDS, CloudFormation, ECS, Lambda), Vercel, Render, Docker, Coolify, CI/CD (GitHub Actions, Automated Deployments)

Data & Analytics: SQL Analytics, Power BI Dashboards, KPI Tracking, Data-Driven Process Optimization

AI/ML: Prompt Engineering, Large Language Models (LLMs), AI-Driven Evaluation, Agentic Work

Infrastructure: Linux Server Management, PWA Development, Performance Monitoring, Caching Strategies

Professional Experience

Full-Stack Engineer & Teck Solution Consultant | Navaia.sa | Jun 2025 – Present | KSA (Remote)

Architected and maintained a scalable QA platform and reporting systems, collaborating across frontend, backend, and AI teams to deliver production-grade solutions.

- Designed optimized PostgreSQL schemas and integrated MongoDB for handling high-volume data efficiently; implemented query optimization and indexing strategies
- Led end-to-end CI/CD deployments on AWS with automated testing pipelines and staging environment.
- Built Playwright-based E2E test suites to ensure reliability across multiple environments and complex user workflows
- Developed secure REST APIs and tRPC/ORPC endpoints with proper authentication, authorization, and error handling
- Mentored junior developers on clean code principles, design patterns, and full-stack best practices
- Troubleshoot production issues, implemented monitoring via CloudWatch, and optimized system performance
- Collaborated with cross-functional teams to translate business requirements into scalable technical specifications

English Coding Instructor | iSchool | Feb 2026 – Present | Cairo, Egypt (Hybrid)

Delivering live coding education entirely in English to diverse student cohorts, bridging theoretical concepts with hands-on application.

- Conducted 500+ live coding sessions covering web development, programming logic, and modern frameworks
- Designed adaptive hands-on projects and exercises tailored to varying student skill levels and learning paces
- Tracked individual progress through structured assessments and code reviews, providing targeted feedback to accelerate learning outcomes
- Collaborated with the education team to continuously refine curriculum structure, session flow, and instructional materials

Full-Stack Developer | Suplift | Jan 2025 – Mar 2025 | Riyadh, KSA (Remote)

- Developed and maintained features for "Yallanrooh", Suplift's flagship entertainment platform, focusing on scalable frontend and backend solutions.
- Collaborated with product and design teams to implement interactive user experiences and optimize rendering performance
- Built responsive UI components using React and integrated APIs for real-time data and content delivery
- Contributed to CI/CD pipeline improvements, reducing deployment cycles and increasing release reliability

Freelance Full-Stack Developer | Upwork | 2024 – Present | Remote (KSA, Hungary, Egypt, Indonesia)

- Designed and delivered production-grade LMS, e-commerce platforms, and analytics systems for international clients across diverse industries.
- Owned full delivery lifecycle: requirements gathering, system architecture, database design, development, testing, documentation, and deployment
- Built scalable backend systems using Node.js and Python (FastAPI); developed secure APIs with Prisma ORM and robust authentication layers
- Implemented comprehensive E2E test suites with Playwright and unit tests to guarantee code reliability before production release
- Set up CI/CD pipelines on Vercel and AWS for automated deployments and continuous integration
- Designed normalized PostgreSQL schemas and optimized queries for high-performance data retrieval under load
- Managed client relationships, milestone tracking, and async workflows to sustain long-term partnerships
- Deployed applications to AWS (EC2, S3, RDS) and Vercel with proper monitoring, logging, and fallback strategies

AI/ML Specialist | Outlier | Mar 2023 – Sep 2025 | Remote (Part-time)

- Contributed to AI-driven evaluation tasks and data-driven web tool development with a focus on system reliability and output quality .
- Worked with prompt engineering and large language models (LLMs) to support AI-driven evaluation and benchmarking tasks
- Enhanced system performance through schema optimization, caching strategies, and API endpoint improvements
- Implemented automated testing frameworks to validate feature deliveries across staging and production environments
- Collaborated with cross-functional teams to ensure reliable E2E deliveries and maintain code quality .

Software Developer & Data Analyst | Sportologyplus (Alostaz EDU) | Jan 2023 – Sep 2024 | Benha, Egypt (On-site)

- Spearheaded the development of a Learning Management System while driving data-informed decision-making across the organization.
- Led the development of a cutting-edge LMS at Alostaz EDU, significantly enhancing user engagement and retention
- Optimized PostgreSQL schema and implemented advanced Prisma ORM models for efficient SQL analytics reporting
- Developed interactive Power BI dashboards to monitor key performance indicators, improving leadership decision-making processes
- Established continuous deployment pipelines on Vercel, boosting site performance .

Data Analyst | INTEL CIA | May 2024 – Sep 2024 | El Sheikh Zaid, Egypt (On-site)

- Leveraged data analysis to drive customer support optimization for Keeta, a high-growth delivery platform.
- Analyzed customer interaction data using SQL to identify trends, pain points, and actionable opportunities for service improvement
- Created interactive Power BI dashboards visualizing key metrics: response times, resolution rates, and customer satisfaction scores
- Collaborated with team leads to optimize support workflows and implement data-driven process improvements
- Resolved customer inquiries with high quality, ensuring satisfaction through clear and effective communication

Web Development Instructor | Google Developer Student Club (GDSC) | Jan 2022 – Jul 2022 | Benha University (On-site)

- Delivered engaging web development workshops fostering practical skills and driving student engagement.
- Delivered sessions on modern web technologies, guiding students in React, TypeScript, and Flutter best practices
- Authored tutorials on state management, clean architecture, repository patterns, and backend API integration
- Collaborated with a diverse team to create a supportive learning environment, resulting in a 30% increase in student engagement

Education

B.Sc. Computer Science & Artificial Intelligence | Benha University, Egypt

Languages

Arabic: Native/Bilingual

English: Fluent
